

Personal Income by State

First Quarter 2001

Revised Quarterly Estimates for 2000

By Duke Tran

The quarterly estimates of State personal income were prepared by the Regional Economic Measurement Division.

THIS article presents the preliminary estimates of State personal income for the first quarter of 2001 and revised quarterly estimates for 2000.¹ The following are among the major highlights for the first quarter of 2001:

- In 33 States, nonfarm personal income increased more than in the fourth quarter of 2000.
- Strength in construction and mining earnings more than offset a decline in durable-goods manufacturing.

This article also discusses the growth in nonfarm personal income from the first quarter of 2000 to the first quarter of 2001, including the following highlights:

- Colorado, Minnesota, and Virginia led the Nation in nonfarm income growth. Strength in high-tech manufacturing industries boosted growth in these States.
- Michigan, Indiana, and Ohio had the slowest growth in nonfarm income, mainly reflecting declines in durable-goods manufacturing, particularly motor vehicles.
- In all 50 States and the District of Columbia, nonfarm income growth outpaced the 2.4-percent increase in U.S. prices.

Growth in the First Quarter of 2001

In the first quarter of 2001, U.S. nonfarm income grew 1.4 percent after growing 1.3 percent in the fourth quarter of 2000 ([table A](#)).² Growth in 33 States was faster in the first quarter than in the fourth. The growth in these States accounted for nearly 80 percent of nonfarm income growth in the Nation.

1. This article features the latest estimates of State personal income that were released on July 24, 2001, by the Bureau of Economic Analysis. These estimates do not yet incorporate results from the latest revision of the national income and product accounts (NIPA's) that were released on July 27, 2001. As part of the NIPA revision, the treatment of farm subsidies was changed, which resulted in a smoothing of the quarterly movements of farm income. This change in methodology will be incorporated into the quarterly estimates of State personal income in October 2001. Because this change will substantially affect the State estimates of farm income, this article focuses on nonfarm personal income.

2. Percent changes from the preceding quarter are expressed at quarterly rates.

In all the States except Wyoming, Michigan, Indiana, Delaware, Oklahoma, and in the District of Columbia, the growth in nonfarm income equaled or exceeded the 0.8-percent increase in the prices paid by U.S. consumers (as measured by the price index for personal consumption expenditures). Prices had increased 0.5 percent in the fourth quarter; the first-quarter pickup mainly reflected accelerations in the prices of energy (electricity and gas), financial services, and food.

By State, North Dakota and Alaska had the largest accelerations in nonfarm income growth ([table B](#)). In North Dakota, the faster growth reflected pickups in earnings in mining, construction, and nondurable-goods manufacturing. In Alaska, the faster growth reflected pickups in earnings in mining, construction, durable-goods manufacturing, and government.

Wyoming, Vermont, New York, and Delaware had the largest decelerations in nonfarm income growth. The slower growth in earnings was spread across most major industries.

U.S. nonfarm income growth mainly reflected pickups in transfer payments and in net earnings ([table B](#)).³ The pickup in transfer payments partly reflected an increase in cost-of-living adjustments to benefits under social security and other programs; the pickup in earnings reflected faster growth in mining, construction, and government. The pickup in government earnings reflected pay raises to Federal civilian employees.

3. Net earnings is calculated as earnings by place of work less personal contributions for social insurance plus an adjustment that converts these earnings to a place-of-residence basis. Earnings by place of work is the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income.

Net earnings is used to analyze changes in the composition of personal income; earnings by place of work is used to analyze changes in the industrial structure of earnings. Net earnings by industry is not available, because the source data used to adjust earnings to a place-of-residence basis are not available by industry and because personal contributions for social insurance are not estimated by industry. For the definitions of the components of earnings, see U.S. Department of Commerce, Bureau of Economic Analysis, *State Personal Income, 1929-97* (Washington, DC: U.S. Government Printing Office, 1999), or go to BEA's Web site at <www.bea.doc.gov/bea/mp.htm>, and look under "Regional programs" for "State Personal Income, 1929-97."

For the Nation, the strength in construction, partly reflecting a mild winter and lower interest rates, and in mining, partly reflecting high energy prices, more than offset the decline in durable-goods manufacturing. Although construction and mining are relatively small sectors of the Nation's economy, they accounted for more than one-third of the 295,000 new jobs created in the first quarter; construction added 102,000 new jobs, and mining added 5,000 new jobs.⁴ By comparison, durable-goods manufacturing lost 126,000 jobs, mostly in the transportation equipment industry, which includes motor vehicles.

The strength in employment in construction translated into a solid growth of 3.7 percent in construction earnings, which was widespread in most States in the first quarter; only Idaho, Iowa, and Mississippi had declines in construction earnings. Earnings in mining also grew 3.7 percent, the fastest growth rate since the first quarter of 1997.

In contrast, earnings in durable-goods manu-

facturing declined 0.5 percent, the first decline since the first quarter of 1996. The decline was widespread among the States; the largest declines were in Delaware (-22.8 percent), Oklahoma (-9.5 percent), and Michigan (-6.6 percent).

Growth from 2000:I to 2001:I

Colorado, Minnesota, and Virginia led the Nation in nonfarm income growth from the first quarter of 2000 to the first quarter of 2001. The rapid growth in these States was fueled by strength in high-tech industries.

Three Great Lakes States—Michigan, Indiana, and Ohio—had the slowest growth in nonfarm income. The slow growth in these States primarily reflected declines in durable-goods manufacturing, as motor vehicle production fell from a high level in the first quarter of 2000.

From the first quarter of 2000 to the first quarter of 2001, nonfarm income in the Nation grew 6.1 percent. In all 50 States and the District of Columbia, the growth rates in nonfarm

4. The job estimates are based on the "Nonfarm Payroll Statistics from the Current Employment Statistics" series, available from the Bureau of Labor Statistics Web site at <www.bls.gov/ceshome.html>.

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income less personal contributions for social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. Not meaningful.

Industry, by State and Region, 2000:IV–2001:I

3. Data are suppressed to avoid disclosure of confidential information.

income outpaced the 2.4-percent increase in the prices paid by U.S. consumers (table C).

Fastest growing States.—Colorado (10.1 percent), Minnesota (7.9 percent), and Virginia (7.6 percent) led the Nation in nonfarm income growth from the first quarter of 2000 to the first quarter of 2001 ([chart 1](#)). These States together accounted for 8.5 percent of the \$493.4 billion increase in total U.S. nonfarm income during this period and for 6.3 percent of U.S. nonfarm income in the first quarter of 2001.

For all three States, particularly for Colorado, the fast growth in nonfarm income was a continuation of strong growth in recent years. The fast growth in all three States was primarily accounted for by solid growth in net earnings.

In all three States, the growth in earnings was strong in all the major nonfarm industries, and it was particularly strong in manufacturing and services (tables C and D). The strength in these industries partly reflected continued fast growth in high-tech industries, such as electronic and electrical equipment (semiconductor manufacturing and related products), industrial machinery and equipment (computer hardware and components), business services (software development and data processing), and multimedia services.

In all three States, earnings in government and in finance, insurance, and real estate also contributed substantially to earnings growth. In Colo-

rado, earnings in wholesale trade also contributed substantially, and in Virginia, earnings in construction also contributed substantially.

Slowest growing States.—Michigan (2.7 percent), Indiana (3.0 percent), and Ohio (3.7 percent) had the slowest growth in nonfarm income from the first quarter of 2000 to the first quarter of 2001. The slow growth in these States continued a trend of below-average growth in recent years. These States together accounted for 4.9 percent of the growth in total U.S. nonfarm income during this period and for 9.2 percent of U.S. nonfarm income in the first quarter of 2001.

The slow growth in nonfarm income in these States primarily reflected weakness in net earnings. In all three States, declines in durable-goods manufacturing, reflecting weakness in motor vehicles, was the major contributor to the slow earnings growth. U.S. domestic production of motor vehicles in the first quarter of 2001 was 15 percent lower than that in the first quarter of 2000.

In Michigan, a decline in wholesale trade also contributed to the slow earnings growth. In Indiana, declines in construction, in government, and in finance, insurance, and real estate also contributed. In Ohio, a decline in construction also contributed.

Tables C, D, 1, and 2 follow. 

Table C.—Earnings by Major Industry, by State and Region, 2000:I–2001:I
 [Percent change, seasonally adjusted]

| | Net earnings ¹ | Earnings by industry | | | | | | | | | | | |

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income—less personal contributions for social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. Also includes agricultural services, forestry, and fishing.

3. Not meaningful.

4. Data are suppressed to avoid disclosure of confidential information.
